SHORET/CONTROL/US OFFICIALS ONL

25X1C

5. Radio truck surrounded by a board fence was standing at the southern edge of Falkenberg, 60 meters east of the road leading to the airfield, near the third building of a settlement. An antenna rod 4 meters long was fixed to the rear wall of the truck and a second one of the same length but inclined at an angle of about 45° was fitted on the front wall. Personnel were not seen. (5)

25X1A

Comments.
The field was believed to be occupied by two fighter regiments which are partly equipped with jet aircraft. This does not seem to have changed: It is believed that most of the planes stationed at the field were in the hangars during the time of observation. The type 1h jet planes west of the runway were probably the alert flight which has often been observed.

For layout sketch of air field see Annex 1.

25X1A

25X1A

25X1A

(2)

(3) The radio station is reported for the first time. For sketch of antenna see Annex 2.

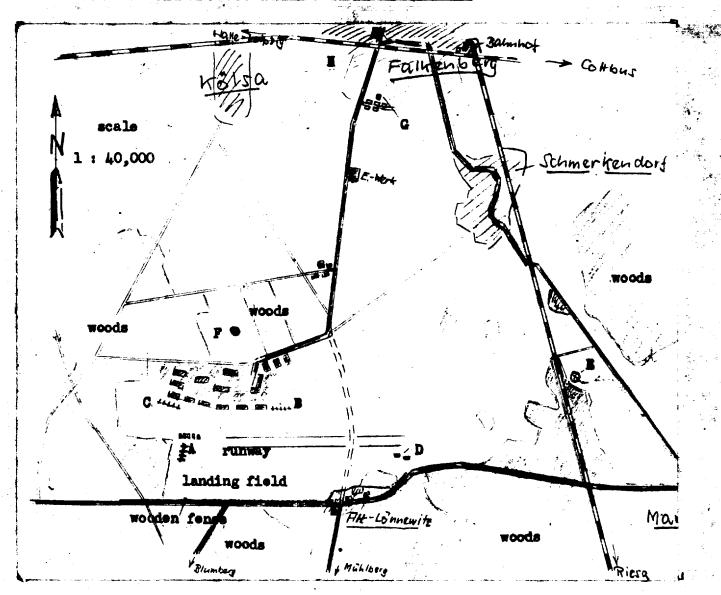

(4) Possibly an Adcock DF station. Its presence was reported before by the

same source.

(5) A radar set was previously observed at this point.

2 Annexes: 2 - photostats with negative print.
